

MELTFIRE

Technical / Safety / Venue Information – INDOOR VENUES

- (1) Fire extinguisher on hand
 - (2) Fire blanket on hand (I supply the blanket)
 - (3) Minimum clear stage space 3 x 5 meters (no mike stands, drum kits etc)
 - (4) Minimum roof height of 4 meters (The Meltfire show can work in a lower roofed and smaller spaces but it does get tight)
 - (5) A sand bucket / metal bucket on hand
 - (6) An outside area for soaking and shaking of fire equipment pre-show
 - (7) A full rehearsal (with fire) to check smoke alarms, sprinklers and ventilation.
 - (8) No curtains or stage drop cloths in the performance area (woolen drops are okay)
 - (9) Stage cables to be gaffed down
-

NOTE : For outdoor shows most of the above is not necessary, but for indoor shows it's good to be extra careful.
